CUT AZIZAH ZAHRA

Informatics graduate · Samudra University

INFORMATION TECHNOLOGY

2026

ABOUT ME

Hello, I'm Cut.

I am an Informatics graduate from Samudra University with an interest in information technology, particularly application development, database management, and computer systems. I have basic knowledge of HTML, CSS, PHP, JavaScript, MySQL, and Linux. I have worked on web-based projects during my studies and completed an internship at the Department of Communication and Informatics. I am able to work in a team, eager to learn, and responsible in completing tasks.

EDUCATION

B.Sc. in Informatics

Samudra University · 2021–2026

SKILLS

What I bring

HARD SKILLS

- HTML & CSS
- JavaScript
- PHP
- MySQL
- Linux
- React
- Next.js
- Tailwind CSS
- Computer networking

EXPERIENCE

MBKM · CERTIFIED INTERNSHIP

Diskominfo Langsa

Langsa City Communication and Informatics Office

JANUARY 23 – APRIL 23, 2024

Completed the Certified Internship Program (MBKM) with Diskominfo Langsa.

MBKM

2024

- JANUARY 23
- APRIL 23

SELECTED PROJECTS

Selected work

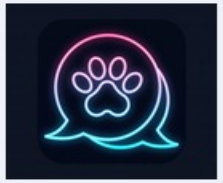

LEARN TO CODE

StudiKoding

An interactive web platform for learning Python through structured lessons.

ONLINE DEMO

studikoding.vercel.app

PET CARE

Pawroutine

An app for organizing routines and tracking pet care.

ONLINE DEMO

pawroutineku.vercel.app

SELECTED PROJECTS

Selected work

PERSONAL FINANCE

PocketSmart

A personal finance application for recording income and expenses, with automatic balance tracking.

ONLINE DEMO

github.com/cutzhraa/pocketsmart/releases/latest

WEB UTILITY

Dupcut

A browser utility for managing files, removing duplicates, and editing images.

ONLINE DEMO

RESEARCH

FINAL PROJECT

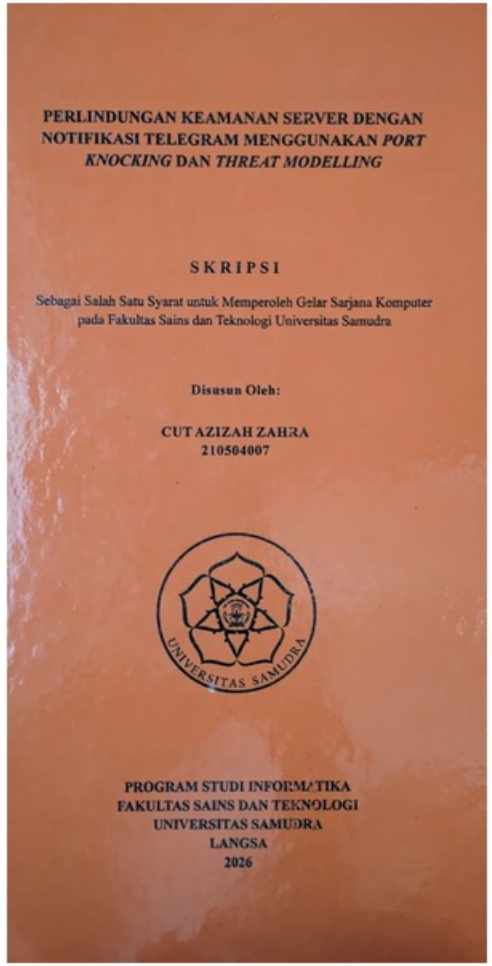

Network security

Server Security Protection with Telegram Notifications Using Port Knocking and Threat Modelling

Port Knocking and Threat Modelling were implemented on a Linux server with a Mikrotik gateway to conceal critical ports. Testing covered brute force, SQL injection, and DoS attacks in VirtualBox, with real-time Telegram bot notifications.

RESEARCH FOCUS

* Linux server security with a Mikrotik gateway.
* Port Knocking to conceal ports from external scans.
* Threat Modelling and real-time Telegram alerts.
* VirtualBox tests for brute force, SQL injection, and DoS.

Thank you

Thanks for exploring my portfolio.
